

LARYNGECTOMY BOOTCAMP

EMPOWERING CLINICIANS

TRANSFORMING PATIENT CARE

BASIC TRAINING: Voice Prosthesis, HMEs, and Attachments

Are you looking to enhance your knowledge and confidence in managing patients who have had a laryngectomy? Whether you're new to laryngectomy care or looking to refine your expertise, our self-paced, on-demand training is designed for Speech-Language Pathologists seeking practical, real-world knowledge and skills to improve patient outcomes.

You'll receive step-by-step guidance on voice prosthesis management, pulmonary rehabilitation, and stoma care – giving you the tools to navigate caring for patients who have had a laryngectomy.

WE WANT YOU

This course will benefit health care professionals with all levels of experience with laryngectomy patients. Whether you and your team are new recruits who are seeing your first laryngectomy patient, or you are seasoned veterans who want to sharpen and update your skills, this course is for you!
