

PROVOX® ACTIVALVE™ VOICE PROSTHESIS STRENGTH AND LEAKAGE THROUGH WARRANTY

The Provox ActiValve is a voice rehabilitation system intended for use in prosthetic voice restoration following a total laryngectomy. It is specifically designed to address prosthesis users that experience frequent changes of their voice prosthesis and is available in three configurations, which vary according to the force that is required to open the valve for speech. A Provox ActiValve device is intended for patients who are experiencing early leakage with previous voice prosthesis (device life less than 4 – 8 weeks).

Provox ActiValve Warranty Start Date

The Provox ActiValve prosthesis must be purchased directly from Atos Medical Inc. (Atos) and the Warranty is only valid for the name or institution listed on the original invoice (the Purchaser). **The Warranty Start Date begins on the date of placement as recorded in the patient's clinical notes. It applies only to new Provox ActiValve Users (first time users) and only for the initial placement.** The Warranty period cannot be extended or renewed or otherwise affected due to subsequent replacements.

Strength and Voice

If during the first 30 days following the Start Date a different valve strength (ie Light, Strong, XtraStrong) is required, the Provox ActiValve device may be exchanged at no charge for a device of higher or lower valve strength. This exchange is available only within the first 30 days and only one "valve strength" exchange is permitted. If following the exchange, voicing remains difficult, the device may be returned to Atos for a full credit by the Purchaser, up to 60 days from the Warranty Start Date.

Leakage Through

If during the first 30 days following the Start Date the user experiences leakage through, Atos will replace the prosthesis OR apply a credit towards the purchase of any other Atos Medical Provox product. This Warranty is limited to leakage through the prosthesis as identified by a clinical professional. The Warranty does not cover device removal or dislodgement due to diagnostic tests, treatment procedures, improper care or leakage around. If the user experiences leakage through beyond the 30 day exchange period, the Purchaser will be credited as outlined in the chart below.

Days Inserted	Issue	Exchange	Credit	%
0 – 30	Incorrect Strength	X		100%
	Leakage Through	X	X	100%
31 – 60	Incorrect Strength		X	100%
	Leakage Through		X	100%
61 – 120	Incorrect Strength	NA	NA	NA
	Leakage Through		X	50%

** Credit is limited to the purchase of another Provox ActiValve or other Atos Medical Provox products

Product Return

To return or exchange a device please contact Atos Medical at 800.217.0025 for a Returned Goods Authorization (RGA) number and a special return package before returning the Provox ActiValve device. Insurance adjustments are the responsibility of the purchaser.

Information for Users and Clinicians Regarding Product Replacement

It is ultimately the responsibility of the clinician to select the appropriate opening force configuration for each Provox ActiValve user. Because each user's needs are different and distinct, it may not be obvious from the outset which configuration is best suited for any given individual. For this reason, users who meet all of the criteria set forth in the Product Replacement Protocol may apply to exchange their originally selected Provox ActiValve for a replacement with a different opening force configuration at no additional cost. For the purpose of the Product Replacement Protocol, the term "user" means an individual user of a Provox ActiValve Prosthesis or a clinician action on behalf of such user.

Product Replacement Protocol

1. Users must notify their supplier of any problems they experience with the opening force of their originally selected Provox ActiValve prosthesis within thirty (30) days of insertion of the product. In addition, users must complete and send the Replacement Request Form within thirty (30) days of insertion of the originally selected Provox ActiValve.
2. Users who meet the notification requirements set forth in Section 1, above, are eligible solely to receive a Provox ActiValve that is of the same size (length between flanges) but configured differently from the originally selected Provox ActiValve. Atos Medical Inc. does not offer, and users are not eligible to obtain, any free replacement prostheses that have the same opening force configuration as the originally selected or a different size from the originally selected Provox ActiValve.
3. Users are ineligible to replace their Provox ActiValve prosthesis at no additional cost if (a) they have failed to comply with the instructions set forth in the Provox ActiValve Clinician's and Patient's Manuals; or (b) their originally selected Provox ActiValve has been damaged due to improper use or clinician insertion, maintenance or other handling.
4. Users who have received a free Provox ActiValve replacement must return their originally selected Provox ActiValve to the supplier within ten (10) days of receipt of the replacement prosthesis. Users are required to return their originally selected Provox ActiValve in secure packaging with the prosthesis immersed in (max 25mL or 1oz) 70% alcohol. Atos Medical Inc. reserves the right to require payment for the replacement of any Provox ActiValve if (a) the user fails to return the originally selected Provox ActiValve; or (b) the returned prosthesis has been damaged due to improper user or clinician insertion, maintenance, packaging or other handling.

Disclaimer of Warranty and Limitation of Liability

Atos Medical Inc. reserves the right to refuse free replacement of the Provox ActiValve at any time. The above Information for Users and Clinicians and Product Replacement protocol does not represent or constitute an offer, guarantee or warranty of any kind as to any user of the Provox ActiValve. Atos Medical Inc. makes no warranty, either express or implied, regarding the useful life of the Provox ActiValve, which may vary according to individual use, biochemical and biophysical conditions, and or other factors beyond the control of Atos Medical Inc. The above Information for Users and Clinicians and Product Replacement Protocol do not represent or constitute an acknowledgement or admission, either express or implied, of any defect, fault or liability of any land on the part of Atos Medical Inc.

CAUTION: United States Federal law restricts this device to sale, distribution and use by or on order of a physician or a licensed practitioner trained in the procedure. Please review the Instructions for Use (IFU) before proceeding. Copies of the IFU are available at www.atosmedical.us or from Atos Medical Inc. The prosthesis should be inspected regularly, at least every six months. For additional information contact your Atos Medical Representative or Atos Medical Customer Service at 800.217.0025.
