DO NOT PLACE EXTERNAL HUMIDIFIER OVER HME!
Bedside Instructions for Use of Provox® Laryngectomy Pulmonary Kits

ALWAYS consult the Instruction For Use for EACH product for complete details. A comprehensive Atos Medical Laryngectomy Pulmonary Kit In-Service is available in digital format.

How to place Provox® LaryTube™

- Rinse LaryTube with water.
- If needed, lightly lubricate LaryTube with water soluble lubricant, and gently slide LaryTube into the stoma.
- If voice prosthesis (VP) is in place, use caution. Direct LaryTube in and down to avoid catching the VP with the end of LaryTube to prevent dislodgement.

When and How to clean Provox LaryTube

- Clean whenever dirty and/or when mucus collects in LaryTube.
- At minimum, clean and disinfect LaryTube at least once per day.

1. Rinse Provox LaryTube with tap water.*
2. Soak LaryTube in non-oil based soap solution for 15 minutes.
3. Clean LaryTube under running water with Provox TubeBrush.
4. Rinse with hot, tap water.*
5. Disinfect once a day with one of the following methods:
   a. Ethanol 70% for 10 minutes
   b. Isopropyl alcohol 70% for 10 minutes
   c. Hydrogen peroxide 3% for 60 minutes
6. Allow LaryTube to dry completely. (Recommended drying time 2 hours.)

*Sterile water may be used for cleaning and rinsing.

When to use Provox® HME cassette

- Use the HME 24/7, even while sleeping.

When to change Provox HME cassette

- Change the HME at least every 24 hours and more frequently, as needed.
- Change the HME when patient complains about increased breathing resistance, which may occur if the HME becomes saturated with mucus.
- **DO NOT** rinse out the HME cassette.

NOTE:
Provox HME cassettes can be used while the patient is sleeping.
